

DIEM LY

Full Stack Software Developer

PROFILE

I am a software developer that has skills in back-end and front-end web development. My previous work experience in process engineering, marketing, and sales has allowed me to excel in solving algorithmically complex problems as well as client-facing communication in building relationships. I have a passion for solving problems. In the next phase of my career, I would like to use my previous experience to create seamless applications with an emphasis on technically challenging facets. It is my technical expertise, passion, and leadership that make me an advantageous candidate for any team.
